All TDM doors are manufactured in accordance with the SABS Standard Specification for Wooden Doors - SABS 545-1989. This specification lays down a rigid set of performance criteria against which each door is tested and approved before the SABS mark can be applied to the door.

We guarantee our doors to be made of high grade materials and of excellent craftsmanship and suited to normal conditions i.e. not excessive heat, humidity, dryness or direct sunshine. Timber is a natural product subject to changes due to variations of humidity and temperature, and whilst we take great care to ensure that the timber used has been treated to make it suitable for the place it will occupy, it is obvious that we cannot know the conditions of every situation in which our products are installed.

All TDM Doors are covered by a 1 year Guarantee in conjunction with our general sales conditions, commencing from date of delivery. Any door found to have a Factory fault will be replaced free of charge.

Subject to the above, we shall not be held responsible for any incidental work or expenses arising out of, or because of, any defect in our products, and our liability shall in no case exceed our invoiced price.

All guarantees are conditional upon doors being treated in accordance with TDM recommendations for the handling and treatment of doors.
