

ceiling access made easy with access panels and JUMBO® t-frames

Access Panels and T-Frames improve access to the ceiling whilst still providing a professional finish and protecting the beauty and integrity of your designs and finishes.

Prefabricated Access Panels are modern and functional and allow for a far more professional overall finish.

Features and Benefits

- Ceiling access without unsightly cracks, joins and timber frames
- Neat clean finish within the ceiling
- Powder coated finish allows for easy cleaning eliminating unsightly finger-marks
- High quality raw materials ensure a long life span
- Easy to install, reducing time on site
- Custom sizes, finishes and hardware are available on request

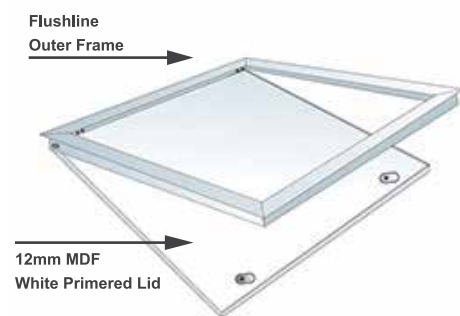

There are a variety of options to choose from to suit the required application and budget.

Flushline Access Panel is designed for a flush plastered ceiling and is the least visible of all leaving only a 2mm shadowline in the ceiling. This 2mm shadowline becomes the only visible evidence of an access point within the ceiling making this an extremely attractive option.

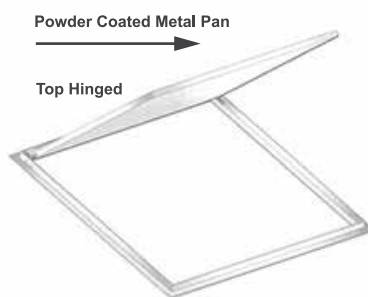

A 12mm MDF lid is incorporated into an aluminium frame which is fitted flush against the JUMBO® plasterboard. The pan is pre-primed allowing for the painting of the ceiling (including the access panel) to be one easy application.

Recommended and standard production sizes are 600 x 600mm.

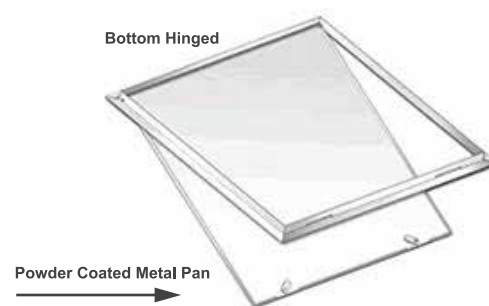

Flushline Access Panel

Top Hinged

Bottom Hinged

Top Hinged, Bottom Hinged and Lay-In Access Panels are all manufactured with an aluminium frame and a metal pan powder coated white. Standard production sizes are 600 x 600mm. (Other sizes can be made to order, but sizes larger than 1200 x 600 mm are not recommended.)

JUMBO® T-Frames

The most economical option that allows a neat finish by providing an aluminium frame in a white powder coated finish. Available in 1200 x 600mm and 600 x 600mm configurations. Our packaging protects each frame and there are 10 T-Frames packed in a carton.

Bill of Quantity
